CITY OF GEORGETOWN WASTEWATER TREATMENT FACILITY  
LIMITATIONS AND WASTEWATER DISCHARGES

1. Waste haulers must have a valid discharge permit to discharge wastewater into the City's treatment system. This permit is not transferable. If the business is sold or otherwise changes ownership, the new owner must apply for a new permit and business license.
2. A discharge report must be completed before any discharge is made into the system. This report will be completed at the City of Georgetown Wastewater Plant. The City will routinely sample dischargers.
3. Domestic wastewater from within the Georgetown service area will be accepted at the Georgetown Plant at 126 Ridge Street. Nondomestic (commercial) wastewater, also from the Georgetown service area, will be accepted and should be disposed at designated site by Wastewater Treatment Plant Supervisor. When discharging at the site, the driver must have in his possession a copy of the discharge report.
4. No commercial wastewater from any source will be accepted without a prior permit. A permit will be granted only after a sample has been submitted and analyzed and it is determined that the discharge will not pose a problem to the treatment facility. In no case will a discharge be accepted from any commercial establishment that is located outside the normal Georgetown service area without explicit approval by Council.
5. This permit is subject to be modified, suspended, or revoked in whole or in part during its term for causes including, but not limited to the following:
  - a. Discharging in any area other than designated sites located at the Georgetown Wastewater Plant.
  - b. Violation of any terms or conditions of the permit or other applicable law or regulation.
  - c. Obtaining a permit by misrepresentation or failure to disclose all relevant facts.
6. The Permittee must apply in writing for a renewal permit not less than ninety (90) days prior to expiration of the current permit.

**PLEASE KEEP THIS COPY FOR YOUR RECORDS**

## RESPONSIBILITIES

### WASTE HAULER RESPONSIBILITIES:

- May be asked to collect sample under supervision of WWTP staff.
- Wash down area when discharge is completed
- Remove and replace manhole lids
- Fill out discharge report

### CITY RESPONSIBILITIES:

- Supervise discharge (if applicable)
- Identify, preserve and refrigerate any samples
- Accompany hauler to designated discharge sites (if applicable)
